**The Concise APA Handbook** Sep 15 2021 Most students struggle with learning how to find references, use them effectively, and cite them appropriately in a required format. One of the most common formats is that of APA. The authors all have vast experience teaching writing courses to various levels of students from undergraduates to graduates in other countries. However, there was lacking a book that could explain the basics of APA in simple, easy-to-understand language for non-native speakers of English, who are often unfamiliar with using references and formatting an essay in a particular method. In order to offer English Learner student writers a source of information that is appropriate for their level, and is cost-effective, this updated APA 7th edition guidebook provides students with important information in clear, concise, user-friendly language, as well as to offer practical examples that will help them grasp the concept of secondary research writing. Much of the published materials on the market targets native speakers of English. The problem with this is that they present the nitpicky details of APA in ways that do not make sense to native speakers of English, let alone to those for whom English is not their first language, because the information is presented in very technical terms that are not easy to understand. This handbook presents the same information in simplified terms with images and step-by-step instructions in ways that make sense to both native and non-native English speaking student writers. Additionally, student writers often struggle with understanding the concept of plagiarism, as well as how to find sources, evaluate the appropriateness of sources, and use sources in effective ways (e.g., how to integrate quotes, when to paraphrase, among others). This book provides this important information that is concise and easy to understand. NOTE: This is a REVISED edition of our original The Concise APA Handbook, which has been updated for APA 7th edition, which was issued in the fall, 2019.

**The Unfolding Of Language** Feb 08 2021 'A persuasive and beautifully written take on how languages are constantly evolving... an enthralling read about human psychology and anthropology as well as linguistics.' ALEX BELLOS \_\_\_\_\_ 'Language is mankind's greatest invention - except of course, that it was never invented'. So begins Guy Deutscher's fascinating investigation into the evolution of language. No one believes that the Roman Senate sat down one day to design the complex system that is Latin grammar, and few believe, these days, in the literal truth of the story of the Tower of Babel. But then how did there come to be so many languages, and of such elaborate design? If we started off with rudimentary utterances on the level of 'man throw spear', how did we end up with sophisticated grammars, enormous vocabularies, and intricately nuanced shades of meaning? Drawing on recent, groundbreaking discoveries in modern linguistics, Deutscher exposes the elusive forces of creation at work in human communication. Along the way, we learn why German maidens are neuter while German turnips are female, why we have feet not foets, and how great changes in pronunciation may result from simple laziness...

*Wisdom Sits in Places* Nov 24 2019 This remarkable book introduces us to four unforgettable Apache people, each of whom offers a different take on the significance of places in their culture. Apache conceptions of wisdom, manners and morals, and of their own history are inextricably intertwined with place, and by allowing us to overhear his conversations with Apaches on these subjects Basso expands our awareness of what place can mean to people. Most of us use the term sense of place often and rather carelessly when we think of nature or home or literature. Our senses of place, however, come not only from our individual experiences but also from our cultures. Wisdom

Sits in Places, the first sustained study of places and place-names by an anthropologist, explores place, places, and what they mean to a particular group of people, the Western Apache in Arizona. For more than thirty years, Keith Basso has been doing fieldwork among the Western Apache, and now he shares with us what he has learned of Apache place-names--where they come from and what they mean to Apaches. "This is indeed a brilliant exposition of landscape and language in the world of the Western Apache. But it is more than that. Keith Basso gives us to understand something about the sacred and indivisible nature of words and place. And this is a universal equation, a balance in the universe. Place may be the first of all concepts; it may be the oldest of all words."--N. Scott Momaday "In *Wisdom Sits in Places* Keith Basso lifts a veil on the most elemental poetry of human experience, which is the naming of the world. In so doing he invests his scholarship with that rarest of scholarly qualities: a sense of spiritual exploration. Through his clear eyes we glimpse the spirit of a remarkable people and their land, and when we look away, we see our own world afresh."--William deBuys "A very exciting book--authoritative, fully informed, extremely thoughtful, and also engagingly written and a joy to read. Guiding us vividly among the landscapes and related story-tellings of the Western Apache, Basso explores in a highly readable way the role of language in the complex but compelling theme of a people's attachment to place. An important book by an eminent scholar."--Alvin M. Josephy, Jr.

**The Seventh Function of Language** Dec 06 2020 From the prizewinning author of *HHhH*, "the most insolent novel of the year" (*L'Express*) Paris, 1980. The literary critic Roland Barthes dies—struck by a laundry van—after lunch with the presidential candidate François Mitterrand. The world of letters mourns a tragic accident. But what if it wasn't an accident at all? What if Barthes was . . . murdered? In *The Seventh Function of Language*, Laurent Binet spins a madcap secret history of the French intelligentsia, starring such luminaries as Jacques Derrida, Umberto Eco, Gilles Deleuze, Michel Foucault, Judith Butler, and Julia Kristeva—as well as the hapless police detective Jacques Bayard, whose new case will plunge him into the depths of literary theory (starting with the French version of *Roland Barthes for Dummies*). Soon Bayard finds himself in search of a lost manuscript by the linguist Roman Jakobson on the mysterious "seventh function of language." A brilliantly erudite comedy that recalls Flaubert's *Parrot* and *The Name of the Rose*—with more than a dash of *The Da Vinci Code*—*The Seventh Function of Language* takes us from the cafés of Saint-Germain to the corridors of Cornell University, and into the duels and orgies of the Logos Club, a secret philosophical society that dates to the Roman Empire. Binet has written both a send-up and a wildly exuberant celebration of the French intellectual tradition.

**A Language in Space** Oct 04 2020 This English version of *A Language in Space: The Story of Israeli Sign Language*, which received the Bahat Award for most outstanding book for a general audience in its Hebrew edition, is an introduction to sign language using Israeli Sign Language (ISL) as a model. Authors Irit Meir and Wendy Sandler offer a glimpse into a number of fascinating descriptions of the ISL community to which linguists and other researchers may not have access. An underlying premise of the book is that language is a mental system with universal properties, and that language lives through people. A clear and engaging read, *A Language in Space* addresses relevant aspects of sign language, including the most abstract questions and matters related to society and community. Divided into three parts, the book covers: the linguistic structure of Israeli Sign Language; the language and its community; and a broad depiction of ISL and the contribution of sign language research to linguistic theory. This book is intended for linguists (with or without a background in sign language), psychologists, sociologists, educators, students, and anyone with an interest in the human capacity for language.

*Directors' Duties in Canada* Feb 26 2020
