Sexuality in World History May 11 2021 This book examines sexuality in the past, and explores how it helps explain sexuality in the present. The subject of sexuality is often a controversial one, and exploring it through a world history perspective emphasizes the extent to which societies, including our own, are still reacting to historical change through contemporary sexual behaviors, values, and debates. The study uses a clear chronological structure to focus on major patterns and changes in sexuality—both sexual culture and sexual behaviors—in the main periods of world history, covering topics including: • The sexual implications of the transition from hunting and gathering economies to agricultural economies; • Sexuality in classical societies; • The postclassical period and the spread of the world religions; •

Sex in an age of trade and colonies; • Changes in sexual behaviors and sexual attitudes between 1750 and 1950; • Sex in contemporary world history. This new edition examines these issues on a global scale, with attention to anthropological insights on sexuality and their relationship to history, the dynamics between sexuality and imperialism, sexuality in industrial society, and trends and conflicts surrounding views of sex and sexuality in the contemporary world.

**Hard Choices** Apr 10 2021 After decades of peace and prosperity, the international order put in place after World War II is rapidly coming to an end. Disastrous foreign wars, global recession, the meteoric rise of China and India and the COVID pandemic have undermined the power of the West's international institutions and unleashed the forces of nationalism and protectionism. In this lucid and groundbreaking analysis, one of Britain's most experienced senior diplomats highlights the key dilemmas Britain faces, from trade to security, arguing that international co-operation and solidarity are the surest ways to prosper in a world more dangerous than ever.

**Global Waves of Debt** Jan 19 2022 The global economy has experienced four waves of rapid debt accumulation over the past 50 years. The first three debt waves ended with financial crises in many emerging market and developing economies. During the current wave, which started in 2010, the increase in debt in these economies has already been larger, faster, and broader-based than in the previous three waves. Current low interest rates mitigate some of the risks associated with high debt. However, emerging market and developing economies are also confronted by weak growth prospects, mounting vulnerabilities, and elevated global risks. A menu of policy options is available to reduce the likelihood that the current debt wave will end in crisis and, if crises do take place, will alleviate their impact.

*The Living Wage* Sep 22 2019 As wealth inequality skyrockets and trade union power declines, the living wage movement has become ever more urgent for public policymakers, academics, and – most importantly – those workers whose wages hover close to the breadline. A real living wage in any part of the world is rarely its minimum wage: it is the minimum income needed to cover living costs and participate fully in society. Most governments' minimum wages are still falling short, meaning millions of workers struggle to cover their living costs. This book brings new, vital insights to the conversation from a carefully selected group of contributors at the forefront of this field. By juxtaposing advances across sectors and countries, and encompassing many different approaches and indeed

definitions of the living wage, Dobbins and Prowse offer a rich tapestry of approaches that may inform public policy. By including the experiences and voices of those workers earning at, or near, the living wage alongside the opinions of leading experts in this field, this book is a pioneering contribution for public policymakers as well as students and academics of work and employment relations, public policy, organizational studies, social economics, and politics.

*World Civilizations* Jul 25 2022 ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. Encompassing social, cultural, political and economic history, the authors examine key civilizations in world history. *World Civilizations* balances the discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact. MyHistoryLab is an integral part of the Stearns/Adas/Schwartz/Gilbert program. An integrated etext and and engaging resources bring history to life for students.

**Global Connections** Mar 29 2020 Emphasizing global interconnectedness, Volume 2 of this undergraduate history textbook covers the early modern period through to modern times.

**World Civilizations** Sep 27 2022 The primary goal of World Civilizations: The Global Experience, Third Edition is to present a truly global history--one that both discusses the development of the world's leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies. The book examines all the world's civilizations, including those in the Western tradition but also those civilizations sometimes neglected in world history texts--for example, the nomadic societies of Asia, Latin America, and the nations and states of the Pacific Rim. World Civilizations balances this discussion of independent developments in all the world's major civilizations with comparative analysis of the results of international contact. MARKET Appropriate for anyone interested in World History.

**Global Biosecurity** Nov 05 2020 This book explores a range of biohealth and biosecurity threats, places them in context, and offers responses and solutions from global and local, networked and pyramidal, as well as specialized and interdisciplinary perspectives. Specifically covering bioterrorism, emerging infectious diseases, pandemic disease preparedness and remediation, agroterrorism, food safety, and environmental issues, the contributors demonstrate that to counter terrorism of any kind, a global, networked, and multidisciplinary approach is essential. To be successful in biosecurity, this book argues it is necessary to extend partnerships, cooperation, and co-ordination between public health, clinical medicine, private business, law enforcement and other agencies locally, nationally and internationally. Internationally, a clear understanding is needed of what has happened in past epidemics and what was accomplished in past bioprograms (in Britain, South Africa, Russia, for example). This book also assesses how, with the right technology and motivation, both a state and a non-state actor could initiate an extremely credible biothreat to security at both local and national levels. This book will be of much interest to students, researchers and practitioners of security studies, public health, public policy and IR in general. Peter Katona is Associate Professor of Clinical Medicine at the David Geffen School of Medicine at UCLA in Infectious Diseases. He is co-founder of Biological Threat Mitigation, a bioterror consulting firm. John P. Sullivan is a lieutenant with the Los Angeles Sheriff's Department. He is also a researcher focusing on terrorism, conflict disaster, intelligence studies, and urban operations. He is co-founder of the Los Angeles Terrorism Early Warning (TEW) Group. Michael D. Intriligator is Professor of Economics at the University of California, Los Angeles (UCLA). He is also Professor of Political Science, Professor of Public Policy in the School of Public Policy

and Social Research, and Co-Director of the Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences, all at UCLA.

**World Civilizations** Dec 30 2022 Designed for introductory-level survey courses in World History. The primary goal of "World Civilizations" is to present a truly global history--from the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while at the same time assessing the development of major societies. Encompassing social and cultural as well as political and economic history, the book examines key civilizations in world history. "World Civilizations" balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

*Rethinking the World* Aug 02 2020 The post-Marxian, new historical materialism described in this book breathes new life into our comprehension of the world. A 200-year perspective on modernity tells us that an all-embracing physical phenomenon holds humankind in its grip. History has recorded two distinct global systems thus far: "laissez faire/metal money," which spanned most of the 19th century and lasted until the outbreak of World War I, and "mixed economy/weak multilateralism," which began after 1945 and exists today. The period between the two systems, 1914-1945, was a chaotic transition. This evolutionary pulsation is well known to students of thermodynamics. It corresponds to the behavior of expanding and complexifying material systems. The exhaustion of oil and other natural resources is pushing the world toward a third global system that may be called "two-level economy/strong multilateralism." It will be impossible to get there without a new chaotic transition. No repeated warnings, academic advice, moral advocacy, inspired reforms, or political leadership can provide a shortcut around it. But if it took "1914-1945" to make a relatively minor adjustment in the global order, what will it take to make a major one?

**The Routledge History of Death since 1800** Dec 18 2021 The Routledge History of Death Since 1800 looks at how death has been treated and dealt with in modern history – the history of the past 250 years – in a global context, through a mix of definite, often quantifiable changes and a complex, qualitative assessment of the subject. The book is divided into three parts, with the first considering major trends in death history and identifying

widespread patterns of change and continuity in the material and cultural features of death since 1800. The second part turns to specifically regional experiences, and the third offers more specialized chapters on key topics in the modern history of death. Historical findings and debates feed directly into a current and prospective assessment of death, as many societies transition into patterns of ageing that will further alter the death experience and challenge modern reactions. Thus, a final chapter probes this topic, by way of introducing the links between historical experience and current trajectories, ensuring that the book gives the reader a framework for assessing the ongoing process, as well as an understanding of the past. Global in focus and linking death to a variety of major developments in modern global history, the volume is ideal for all those interested in the multifaceted history of how death is dealt with in different societies over time and who want access to the rich and growing historiography on the subject. Chapter 1 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license at [https://tandfbis.s3-us-west-2.amazonaws.com/rt-files/docs/Open+Access+Chapters/9780429028274\\_oachapter1.pdf](https://tandfbis.s3-us-west-2.amazonaws.com/rt-files/docs/Open+Access+Chapters/9780429028274_oachapter1.pdf).

**The Peter Principle** Jul 01 2020 The Peter principle is defined "In a hierarchy, every employee tends to rise to his level of incompetence"--Cover.

Special Economic Zones in Africa Oct 24 2019 "This book, designed for policymakers, academics and researchers, and SEZ program practitioners, provides the first systematic and comprehensive analysis of SEZ programs in Sub-Saharan Africa. It is the result of detailed surveys and case studies conducted during 2009 in ten developing countries, including six in Sub-Saharan Africa. The book provides quantitative evidence of the performance of SEZs, and of the factors which contribute to that performance, highlighting the critical importance not just of the SEZ itself but of the wider national investment climate in which it functions. It also provides a comprehensive guide to the key policy questions that confront governments establishing SEZ programs, including: if and when to launch an SEZ program, what form of SEZ is most appropriate, and how to go about implementing it. Among the most important findings from the study that is stressed in the book is the shift from traditional enclave models of zones to SEZs that are integrated ? with national trade and industrial strategies, with core trade and social infrastructure, with domestic suppliers, and with local labor markets. Although the book focuses primarily on the experience of Sub-

Saharan Africa, its lessons will be applicable to developing countries around the world."

World Civilizations Oct 28 2022

*Studyguide for World Civilizations* Oct 16 2021 Never HIGHLIGHT a Book Again! Includes all testable terms, concepts, persons, places, and events. *Understanding Global Sexualities* Dec 06 2020 Over the course of the past thirty years, there has been an explosion of work on sexuality, both conceptually and methodologically. From a relatively limited, specialist field, the study of sexuality has expanded across a wide range of social sciences. Yet as the field has grown, it has become apparent that a number of leading edge critical issues remain. This theory-building book explores some of the areas in which there is major and continuing debate, for example, about the relationship between sexuality and gender; about the nature and status of heterosexuality; about hetero- and homo-normativity; about the influence and intersection of class, race, age and other factors in sexual trajectories, identities and lifestyles; and about how best to understand the new forms of sexuality that are emerging in both rich world and developing world contexts. With contributions from leading and new scholars and activists from across the globe, this book highlights tensions or 'flash-points' in contemporary debate, and offers some innovative ways forward in terms of thinking about sexuality – both theoretically and with respect to policy and programme development. An extended essay by Henrietta Moore introduces the volume, and an afterword by Jeffrey Weeks offers pointers for the future. The contributors bring together a range of experiences and a variety of disciplinary perspectives in engaging with three key themes of sexual subjectivity and global transformations, sexualities in practice, and advancing new thinking on sexuality in policy and programmatic contexts. It is of interest to students, researchers and activists in sexuality, sexual health and gender studies, especially those working from public health, sociological and anthropological perspectives.

**The Global Governance of Knowledge** Aug 14 2021 Patent offices around the world have granted millions of patents to multinational companies. Patent offices are rarely studied and yet they are crucial agents in the global knowledge economy. Based on a study of forty-five rich and poor countries

that takes in the world's largest and smallest offices, Peter Drahos argues that patent offices have become part of a globally integrated private governance network, which serves the interests of multinational companies, and that the Trilateral Offices of Europe, the USA and Japan make developing country patent offices part of the network through the strategic fostering of technocratic trust. By analysing the obligations of patent offices under the patent social contract and drawing on a theory of nodal governance, the author proposes innovative approaches to patent office administration that would allow developed and developing countries to recapture the public spirit of the patent social contract.

**The Global Airline Industry** Feb 08 2021 Extensively revised and updated edition of the bestselling textbook, provides an overview of recent global airline industry evolution and future challenges Examines the perspectives of the many stakeholders in the global airline industry, including airlines, airports, air traffic services, governments, labor unions, in addition to passengers Describes how these different players have contributed to the evolution of competition in the global airline industry, and the implications for its future evolution Includes many facets of the airline industry not covered elsewhere in any single book, for example, safety and security, labor relations and environmental impacts of aviation Highlights recent developments such as changing airline business models, growth of emerging airlines, plans for modernizing air traffic management, and opportunities offered by new information technologies for ticket distribution Provides detailed data on airline performance and economics updated through 2013

**Advanced Placement World History: Modern** May 23 2022

**The Routledge International Handbook of Mad Studies** Jan 27 2020 By drawing broadly on international thinking and experience, this book offers a critical exploration of Mad Studies and advances its theory and practice. Comprised of 34 chapters written by international leading experts, activists and academics, this handbook introduces and advances Mad Studies, as well as exploring resistance and criticism, and clarifying its history, ideas, what it is, and what it can offer. It presents examples of mad studies in action, covering initiatives that have been taken, their achievements and what can be learned from them. In addition to sharing research findings and evidence, the book offers examples and insights for advancing understandings of experiences of madness and distress from the perspectives of those who have (had) those experiences, and also explores ways of supporting people oppressed by conventional understandings and systems. This book will be of

interest to all scholars and students of Mad Studies, disability studies, sociology, socio- legal studies, mental health and medicine more generally. *World City Network* Oct 04 2020 Peter Taylor's compelling insights challenge us to view cities as part of a global network, divorced from the constraints of national or even regional boundaries.

*Intercultural Learning* Sep 03 2020 The ability to recognise and understand your own cultural context is a prerequisite to understanding and interacting with people from different cultural backgrounds. An intercultural learning approach encourages us to develop an understanding of culture and cultural difference, through reflecting on our own context and experience.

*Childhood in World History* Nov 17 2021 Filling a gap in a field with very few teaching books available, *Childhood in World History* provides a much-needed historical overview. Studying childhood historically greatly advances our understanding of what childhood is about, and a world history focus permits broad questions to be asked. Peter N. Stearns, an esteemed name in the field, focuses on childhood in several ways: childhood across change – the shift from hunting and gathering to an agricultural society, the impact of civilization, and the emergence of major religions new and old debates about the distinctive features of Western childhood, including child labour the emergence of a modern, industrial pattern of childhood in the West, Japan and communist societies, focusing on education and economic independence globalization and the spread of child-centred consumerism. Highlighting the gains, the divisions, and the losses for children across the millennia, this fascinating book will appeal to students across the board, and will prove an excellent teaching resource.

Turnaround Apr 29 2020 Thirty years ago, China seemed hopelessly mired in

poverty, Mexico triggered the Third World Debt Crisis, and Brazil suffered under hyperinflation. Since then, these and other developing countries have turned themselves around, while First World nations, battered by crises, depend more than ever on sustained growth in emerging markets. In *Turnaround*, economist Peter Blair Henry argues that the secret to emerging countries' success (and ours) is discipline -- sustained commitment to a pragmatic growth strategy. With the global economy teetering on the brink, the stakes are higher than ever. And because stakes are so high for all nations, we need less polarization and more focus on facts to answer the fundamental question: which policy reforms, implemented under what circumstances, actually increase economic efficiency? Pushing past the tired debates, Henry shows that the stock market's forecasts of policy impact provide an important complement to traditional measures. Through examples ranging from the drastic income disparity between Barbados and his native Jamaica to the "catch up" economics of China and the taming of inflation in Latin America, Henry shows that in much of the emerging world the policy pendulum now swings toward prudence and self-control. With similar discipline and a dash of humility, he concludes, the First World may yet recover and create long-term prosperity for all its citizens. Bold, rational, and forward-looking, *Turnaround* offers vital lessons for developed and developing nations in search of stability and growth.

engaging resources bring history to life for students.

Globalization in World History Mar 21 2022 In this third edition of  
Globalization in World History, Peter Stearns explores the roots of  
contemporary globalization, examining shifts in the global flow of people,  
goods, and ideas as early as 1000 CE. Exploring how four moments in history  
have accelerated the process of globalization, Stearns's narrative details how  
factors such as economics, migration, disease transmission, culture, the  
environment, and politics have influenced the nature of globalization as we  
understand it today. This revised edition includes: Updates to the whole study  
with appropriate recent references; New brief transition sections that focus  
attention on the Mongol period, debates over the role of the eighteenth  
century, and the partial retreat from globalization after World War I; A new  
final chapter that deals with the rise in attacks on globalization during the  
most recent decade, from populist objections to the implications of growing  
authoritarianism, raising the question of whether a new transition is taking  
shape around us today. Through an interdisciplinary approach that links  
political, sociological, and historical perspectives, Stearns provides a  
comprehensive overview of globalization and the historical factors that have  
shaped it. This book will be of interest to undergraduate and postgraduate  
students of world history, economic history, and political economy.

Global Green Politics Jun 12 2021 A comprehensive overview of the Green  
perspective on a range of global politics topics, including concrete strategies  
for achieving change.

Handbook of Global and Multicultural Negotiation Sep 15 2021 Praise for  
Handbook of Global and Multicultural Negotiation "In today's globalized  
world, few competencies are as essential as the ability to negotiate across  
cultures. In this insightful and practical book, Chris Moore and Peter  
Woodrow draw on their extensive global experience to help us understand the

intricacies of seeking to reach intercultural agreements and show us how to get to a wise yes. I recommend it highly!" William Ury coauthor, *Getting to Yes*, and author, *The Power of a Positive No* "Rich in the experience of the authors and the lessons they share, we learn that culture is more than our clothing, rituals, and food. It is the way we arrange time, space, language, manners, and meaning. This book teaches us to understand our own culture so we are open to the other and gives us practical strategies to coordinate our cultural approaches to negotiations and reach sustainable agreements." Meg Taylor compliance advisor/ombudsman of the World Bank Group and former ambassador of Papua New Guinea to the United States of America and Mexico "In a globalized multicultural world, everyone from the president of the United States to the leaders of the Taliban, from the CEO of Mittal Steel to the steelworkers in South Africa, needs to read this book. Chris Moore and Peter Woodrow have used their global experience and invented the definitive tool for communication in the twenty-first century!" Vasu Gounden founder and executive director, ACCORD, South Africa "Filled with practical advice and informed by sound research, the *Handbook of Global and Multicultural Negotiation* brings into one location an extraordinary and comprehensive set of resources for navigating conflict and negotiation in our multicultural world. More important, the authors speak from decades of experience, providing the best book on the topic to date—a gift to scholars and practitioners alike." John Paul Lederach Professor of International Peacebuilding, Kroc Institute, University of Notre Dame

*World Civilizations* Nov 29 2022 The primary goal of "World Civilizations" is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. "World Civilizations" balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

One World Nov 24 2019 Written by a religious historian, this is an introduction to early Christian thought. Focusing on major figures such as St Augustine and Gregory of Nyssa, as well as a host of less well-known thinkers, Robert Wilken chronicles the emergence of a specifically Christian

intellectual tradition. In chapters on topics including early Christian worship, Christian poetry and the spiritual life, the Trinity, Christ, the Bible, and icons, Wilken shows that the energy and vitality of early Christianity arose from within the life of the Church. While early Christian thinkers drew on the philosophical and rhetorical traditions of the ancient world, it was the versatile vocabulary of the Bible that loosened their tongues and minds and allowed them to construct the world anew, intellectually and spiritually. These thinkers were not seeking to invent a world of ideas, Wilken shows, but rather to win the hearts of men and women and to change their lives. Early Christian thinkers set in place a foundation that has endured. Their writings are an irreplaceable inheritance, and Wilken shows that they can still be heard as living voices within contemporary culture.

*Happiness in World History* Mar 09 2021 Happiness in World History traces ideas and experiences of happiness from early stages in human history, to the maturation of agricultural societies and their religious and philosophical systems, to the changes and diversities in the approach to happiness in the modern societies that began to emerge in the 18th century. In this thorough overview, Peter N. Stearns explores the interaction between psychological and historical findings about happiness, the relationship between ideas and popular experience, and the opportunity to use historical analysis to assess strengths and weaknesses of dominant contemporary notions of happiness. Starting with the advent of agriculture, the book assesses major transitions in history for patterns in happiness, including the impact of the great religions, the unprecedented Enlightenment interest in secular happiness and cheerfulness, and industrialization and imperialism. The final, contemporary section covers fascist and communist efforts to define alternatives to Western ideas of happiness, the increasing connections with consumerism, and growing global interests in defining and promoting well-being. Touching on the experiences in the major regions of Asia, Africa, Latin America, Europe, and North America, the text offers an expansive introduction to a new field of study. This book will be of interest to students of world history and the history of emotions.

**Understanding Global Security** Dec 26 2019 Fully revised to incorporate recent developments, this fourth edition of Understanding Global Security analyses the variety of ways in which people's lives are threatened and/or secured in contemporary global politics. The traditional focus of Security Studies texts: war, deterrence and terrorism, are analysed alongside non-military security issues such as famine, crime, disease, disasters,

environmental degradation and human rights abuses to provide a comprehensive survey of how and why people are killed in the contemporary world. This new edition features: Greater coverage of the evolving theoretical literature on security, including more analysis of critical theory perspectives and emerging schools of thought. Reflections on recent developments in the conflicts in Syria and Ukraine. New data and cases on poverty, hunger and depression and greater analysis of the social and political implications of the prolonged period of stagnation the global economy has gone through. New content reflecting the recent resurgence in populist nationalism evident in the election of Trump in the USA, the UK's exit from the EU and the authoritarian turn taken in many countries. Analysis of the 2015 Paris climate change treaty and the international responses to recent pandemics such as Ebola and Zika A new section has been included on suicide, plugging a gap evident in the earlier editions. User-friendly and easy to follow, this highly acclaimed and popular academic textbook is designed to make a complex subject accessible to all and will continue to be essential reading for everyone interested in security.

**The First Letter of Peter** May 31 2020 ?1 Peter is a significant letter, seen by many scholars to be an ecumenical bridge and anchor. It is first and foremost about the transformative joy of faith in Jesus Christ. This commentary offers a close reading of the text from beginning to end, drawing on a multiplicity of voices and engaging in a number of foundational themes for the Christian community according to the apostolic author: hope, holiness, suffering, joy, witness, hospitality, exile, resurrection, leadership. Tackling the themes raised by the epistle including slavery, exile and refugees, patriarchy, hierarchy, oppression, gender justice, and the risk of hospitality, the book engages with these topics not only through commentary, but also through short excursions which draw the reader more deeply into some of the difficult questions. Designed as the official commentary resource for the Lambeth Conference in 2020, and structured around the themes of the conference, the book offers a unique range of perspectives on an oft-overlooked epistle. With contributions from an impressive range of scholars including Paula Gooder, Emma Ineson, Paul Swarup, Musa Dube, Craig Keener, and Kwok Pui Lan, it will provide an important resource for anyone studying, teaching, or preaching from the letter.

*Experience Design* Feb 26 2020 How can we design better experiences? Experience Design brings together leading international scholars to provide a cross-section of critical thinking and professional practice within this

emerging field. Contributors writing from theoretical, empirical and applied design perspectives address the meaning of 'experience'; draw on case studies to explore ways in which specific 'experiences' can be designed; examine which methodologies and practices are employed in this process; and consider how experience design interrelates with other academic and professional disciplines. Chapters are grouped into thematic sections addressing positions, objectives and environments, and interactions and performances, with individual case studies addressing a wide range of experiences, including urban spaces, the hospital patient, museum visitors, mobile phone users, and music festival and restaurant goers.

**International Handbook of Population Aging** Jul 13 2021 The International Handbook of Population Aging examines research on a wide array of the profound implications of population aging. It demonstrates how the world is changing through population aging, and how demography is changing in response to it.

*Dockworker Power* Aug 22 2019

Consumerism in World History Apr 22 2022 The desire to acquire luxury goods and leisure services is a basic force in modern life. This work explores both the historical origins and world-wide appeal of this relatively modern phenomenon.

[online.popcom.gov.ph](http://online.popcom.gov.ph)
