"Reseña del editor These days, whether you're designing a building or a toaster, a savvy knowledge of materials is increasingly critical. And keeping up with the constant flow of new materials, let alone their applications, properties, and sources, is an increasingly difficult and time-consuming task. Blaine Brownell, author of ""Transmaterial"", known to thousands of web users for his ""product of the week"" email service alerting designers to new materials that are reshaping our world, has created this handy and affordable reference to the most interesting and most useful new materials now available. ""Transmaterial"" is indexed in multiple ways for the sake of maximum convenience, and utilizes the new CSI MasterFormat 2004 product categorization system. With more than 200 materials, organized by category, described, pictured, and annotated with technical and sourcing information, this catalog is an essential tool for any architect or designer interested in keeping up with the rapid developments in the field of materials, looking for a source of inspiration for their designs, or just eager to get their hands on real materials in an effort to understand the incredibly innovative palette now available to us. Biografía del autor Blaine Brownell is an architect and an associate with NBBJ, with eight years of experience working in Tokyo, Houston, Nagoya, and now Seattle. Blaine has collaborated on several projects which have been published in *Architectural Record* and *Architecture*, two of which received P/A awards,

and his work has been exhibited at the Seattle Architectural Foundation Center on Contemporary Art, Seattle; Consolidated Works, Seattle; Diverse Works, Houston; and Seaside, Florida, where he was selected as a finalist for the Seaside Ceremonial Landmark Design Competition in 2001."

Transmaterial 3 provides a broad synopsis of the state of technological advances in materials today with a special emphasis on new developments in the field of biopolymers and various agriculturally derived products biomimetic products systems and processes that seek to emulate natural examples including low embodied energy and biochemically manufactured products grown materials nanoscale

Transmaterial 3 provides a broad synopsis of the state of technological advances in materials today with a special emphasis on new developments in the field of biopolymers and various agriculturally derived products biomimetic products systems and processes that seek to emulate natural examples including low embodied energy and biochemically manufactured products grown materials nanoscale.
