"Pressestimmen 'A great book to use to assist preservice teachers, inservice teachers, and administrators with ways to meet the needs of all types of gifted learners.'--Thea H. Williams-Black, Assistant Professor of Elementary Education (05/12/2009)'Each chapter offers the practitioner page after page of suggestions on how to apply the research discussed to educational practice. The

applications sections are extremely intriguing and offer more than the traditional 'discovery learning' approach to teaching these remarkable children.'-- (02/16/2010)'I loved this book. It expands the reader's definition of what it means to be gifted. Many schools focus only on academic giftedness, but this book has very practical ways to help students gifted in the arts utilize their talents. Sousa provides enough information to help someone who has never developed a gifted program before get started, and yet challenges the reader's preconceived notions enough to help a school with a rich gifted program have discussions that will improve the existing program.'-- (05/12/2009)'Pulls many areas of gifted research, knowledge, and applications together in a clear and concise manner. This is a one-stop book for teachers who have high-ability/gifted students in a classroom and need to understand how these students' brains work and how to plan effective instruction.'-- (05/12/2009)'Brain research is changing the way teachers respond to student needs, and this book deals with the topic well. The biological descriptions of brain anatomy were simplified so that non-science educators could comprehend the research with the author's ideas on implications. While the book is intended to focus on identifying and educating gifted and talented students, it also provides insights for instruction of all students.'-- (05/12/2009) Über den Autor und weitere Mitwirkende David A. Sousa, EdD, is an international consultant in educational neuroscience and author of more than a dozen books that translate brain research into strategies for improving learning. He has presented to more than 200,000 educators across the United States, Canada, Europe, Australia, New Zealand, and Asia. He has taught high school chemistry and served in administrative positions, including superintendent of schools. He was an adjunct professor of education at Seton Hall University and a visiting lecturer at Rutgers University. Dr. Sousa has edited science books and published dozens of articles in leading journals. His books have been published in French, Spanish, Russian, Chinese, Arabic, Korean, and several other languages. He is past president of the National Staff Development Council (now Learning Forward) and has received honorary degrees and awards for his commitment to research, professional development, and science education. He has appeared on NBC's Today Show and National Public Radio to discuss his work with schools using brain research."
