Findings ? The paper demonstrates the impact of the innovation of IoT on intellectual capital owned by a high intensity cognitive company by determining its economic value The results demonstrate that the introduction of projects involving the use of the IoT has increased the

value of intellectual capital over the years

Abstract One of the most important challenges faced by governments is to develop tangible public plans in coproduction with society This is even a more complex task in Science Technology and Innovation ST amp I public plans due to the intangibility and the lack of value perception by society. Knowledge is primarily considered as powerful value producer The dynamic relationship of university and society starts with the economic exploitation of research results with the intention on the one hand to safeguard the equilibrium of financial resources to support academic activity on the other hand with the intention to sustain society.
